**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 25-33 have been examined.

#### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 25-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ueda et al. European Patent No. 0802535 (hereinafter Ueda) in view of Sogabe et al. U.S. Pat. No. 6611534 (hereinafter Sogabe).

4. As per 25, 28, and 31, Ueda discloses an information recording medium having cipher key information, wherein scrambled data and non-scrambled data are recorded on the information recording medium, wherein scrambled key information is generated from at least the cipher key information, wherein data is scrambled by using the scrambled key information to generate the scrambled data (Ueda: page 3 lines 34-59 and page 10 lines 1-29). Ueda does not explicitly disclose the non-scrambled data includes the specific data having copy control information. However, Sogabe discloses use copy control information to generate the contents key in order to decrypt encrypted data (Sogabe: column 7 line 20 – column 8 line 27 and column 9 lines 33 – column 10 line 15). It would have been obvious to one having ordinary skill in the

Art Unit: 2131

art to combine the teachings of Sogabe within the system of Ueda because it increases the security of copy protection by using copy control information to increase the difficulty of obtaining cipher key through the use of a control key.

5. As per claim 26, 29, 32, Ueda as modified discloses the limitations in claims 25, 28, and 31 respectively. Ueda as modified further discloses the scrambled key information is generated without making selection based on the specific data (Sogabe: column 7 line 20 – column 8 line 27 and column 9 lines 33 – column 10 line 15: the contents key is generated by deciphering the enciphered contents key using control keys).

6. As per claim 27, 30, and 33, Ueda as modified discloses the limitations in claims 25, 28, and 31 respectively. Ueda as modified further discloses wherein the generating of the scrambled key information comprises: generating key information from the cipher key information and other information; and generating the scrambled key information from the key information and the specific data (Sogabe: column 7 line 20 – column 8 line 27 and column 9 lines 33 – column 10 line 15).

### ***Response to Arguments***

7. Applicant's arguments filed 8/26/04 have been fully considered but they are not persuasive.

Regarding to applicant's amendment and argument, applicant argues that the scramble key information is generated without making selection based on the specific data. However,

Art Unit: 2131

Sogabe discloses the content key is generated by deciphering the enciphered content key by using control key, not selection. Therefore, applicant's argument is respectfully traversed.

***Conclusion***

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
